Jekyll & Hyde

The Strange Case of Dr Jekyll and Mr Hyde were written in 1886 by the Scottish author **Robert Louis Stevenson**. Stevenson's desire was to write an allegoric novel about mans dualism, about good and evil, moral and urges. But at the end he wrote a dramatic thriller.

Chasing the grotesque comedy, **Paolo Nani** has transported this dualism to the black clown's universe. We follow a shy professor's troublesome presentation of his masterwork. Driven by his desire of recognition and success he experiments on him self to create a different and more extrovert personality. But he gets trapped inside himself. In a liberating theatre game Paolo Nani will attempt to tear the black clown's inside out, to demonstrate man's complex, basic, terms of existence.
